Skills Gap Analysis and Career Pathing Framework

HR Knowledge Hub | Learning and Development

Owner: Alicia Gomez | Last updated: October 30, 2026

Summarizes the skills gap analysis conducted across engineering and operations and proposes career pathing tracks to close the gaps.

Key Points

- Cloud infrastructure and data analysis were the two largest identified skill gaps.
- Career pathing tracks are offered for both individual contributor and management tracks.
- Learning stipends of $1,500 per year support external certifications aligned to the gap areas.
- Progress against pathing goals is reviewed during mid-year check-ins.
